The board of directors (the “**Board**”) of Aluminum Corporation of China Limited* (the “**Company**”) announces the unaudited interim results of the Company and its subsidiaries (together, the “**Group**”) for the six months ended 30 June 2022. On behalf of the Board and all employees of the Company, the Board would like to express its gratitude to all shareholders for their attention and support to the Company.

PRODUCT MARKET REVIEW

ALUMINA MARKET

In the first half of 2022, the price of alumina rose and then fell before returning to a stable trend.

In the international market, Ukraine closed its Nikolayev alumina plant with a capacity of 1.70 million tonnes under the influence of the Russia-Ukraine conflict which raised market concerns about supply and the spot price of alumina skyrocketed. With supply concerns resolved, alumina prices began to fall back. At the end of March, Australia prohibited the export of alumina to Russia, resulting in the long-term delivery of alumina entering into the spot market in the second quarter of 2022, and leading to an increasing market supply. In the first half of the year, the average FOB price of overseas alumina was USD398 per tonne, representing a year-on-year increase of 38% with the lowest and highest prices being USD345 per tonne and USD533 per tonne, respectively.

In the domestic market, under the influence of the production restriction of the Winter Olympics and the pandemic in the main production area of alumina, the domestic spot price of alumina increased at the beginning of the year, reaching RMB3,305 per tonne in mid-February, representing an increase of approximately 18% over the beginning of the year. Along with environmental control and the gradually subsided impact of the pandemic, the supply of alumina increased with a drop of the price. In late March, with the resumption of production of electrolytic aluminum capacity in Southwest China, the rectification of Guizhou mines and the tight supply of bauxite, the reduction in the production of alumina enterprises resulted in an unbalanced regional supply and demand, which led to a rapid increase in alumina prices. In mid-May, with the resumption of alumina production and new production, the price of alumina continued to decline, while the sudden increase in alumina exports provided support for the gradual stability of alumina prices. In the first half of the year, the price of alumina fluctuated between RMB2,800–3,300 per tonne, and the volatility narrowed in the second quarter. The average spot-price of domestic alumina was RMB3,008 per tonne, representing a year-on-year increase of 26.1%.

According to the statistics, the global output and consumption of alumina for the first half of 2022 were approximately 66.79 million tonnes and approximately 67.19 million tonnes, respectively, representing a year-on-year decrease of 1.0% and increase of 3.3%, respectively. The domestic output and consumption of alumina were approximately 37.97 million tonnes and approximately 39.46 million tonnes, respectively, representing a year-on-year increase of 0.6% and 5.4%, respectively.

PRIMARY ALUMINUM MARKET

In the first half of 2022, under the influence of events such as the Russia-Ukraine conflict, the energy crisis in Europe, the Fed's interest rate hike and the pandemic in China, the price of aluminum fell after rising, trending upward.

In the international market, the outbreak of the Russia-Ukraine conflict triggered the energy crisis in Europe. The skyrocketed price of natural gas in Europe forcibly reduced the production of electrolytic aluminum plants and significantly slowed down the efficiency of global cargo circulation. With a prominent shortage of overseas aluminum supply, the prices of electrolytic aluminum in Europe, North America and other regions recorded the highest in history. Since mid-to-late March, major economies, in particular the United States, have been raising interest rates rapidly to curb inflation, triggering financial market concerns about the global economic recession. The pessimism has continued to spread with a serious blow to market confidence. Meanwhile, the flare-up of the pandemic severely hinged China's economy and demand. Against this backdrop, metal prices fell from high and continued to decline, showing an "inverted-V" trend overall with an upward shift. In the first half of 2022, the average prices of current month aluminum futures and three-month aluminum futures at LME were USD3,079 per tonne and USD3,076 per tonne, respectively, representing a year-on-year increase of 37.1% and 36.3%, respectively.

In the domestic market, the domestic aluminum price performed similarly as the international aluminum price, falling after rising. In the first quarter, driven by the aluminum price on the LME, the price of electrolytic aluminum increased significantly to RMB24,255 per tonne. Subsequent to the concerns about the global economic recession caused by the Fed's aggressive interest rate hike policy, suspension of work and production and depressed consumption caused by China's pandemic prevention and control and other factors, aluminum consumption remained stagnant. In addition, China's GDP in the first quarter was far below expectations with insufficient market confidence, and aluminum price fell from a high level. In the first half of 2022, the average prices of current month aluminum futures and three-month aluminum futures at SHFE were RMB21,461 per tonne and RMB21,406 per tonne, representing a year-on-year increase of 23.3% and 23.5%, respectively.

According to the statistics, the global output and consumption of primary aluminum in the first half of 2022 were approximately 34.04 million tonnes and approximately 34.51 million tonnes, respectively, representing a year-on-year increase of 0.4% and decrease of 2.9%, respectively. The domestic output and consumption of primary aluminum were approximately 19.70 million tonnes and approximately 19.65 million tonnes, respectively, representing a year-on-year increase of 0.3% and decrease of 2.5%, respectively.

BUSINESS REVIEW

In the first half of 2022, under the development goal of building itself into a world-class aluminum company with global competitiveness, the Company further implemented new development philosophy, enhanced the capability to create value, deepened all-factor benchmarking, strengthened quality and efficiency improvement by accelerating transformation and upgrading and seizing market opportunities, and achieved new results in high-quality development.

1. Operating results increased significantly, with further improvement of operational quality and brand image. In the first half of the year, the Company gave priority to promoting the resumption of work and production coupled with stability and efficiency, and realized the increase in profits of major products of alumina, carbon, refined alumina and energy. The return on assets has increased significantly. Operating revenue amounted to RMB145,403 million, representing a year-on-year increase of 20.35%. Profit before income tax amounted to RMB6,957 million, representing a year-on-year increase of 14.82%. Net operating cash flow was RMB14,983 million, representing a year-on-year increase of 57.98%; Interest-bearing liabilities decreased by RMB6,776 million as compared with the beginning of the year. Standard & Poor's upgraded the Company's credit rating from "BBB-" to "BBB", while Fitch and CCT maintained their ratings of the Company at the highest level in the industry. The Company expanded green financing channels and successfully issued low-interest carbon neutral green bonds and the first batch of low-carbon transformation bonds totaling RMB1,500 million, leading green development in the industry.

2. The Company deepened benchmarking management and continuously enhanced value creation capability. Chalco Guinea overcame difficulties such as the pandemic and strikes, and the volume of ore transported increased by 750,000 tonnes year-on-year; Baotou Aluminum, Shanxi Zhongrun and Shanxi New Materials achieved full production and operation. Liancheng Branch accelerated the resumption of work and production. The cumulative production of electrolytic aluminum was 450,000 tonnes, and the capacity utilization rate increased by 2.7 percentage points as compared to the corresponding period of last year; Alumina and carbon remained stable with capacity utilization rates increasing 2.8 and 2.1 percentage points, respectively, as compared to the corresponding period of last year; Coal production of Ningxia Energy increased by 3.28 million tonnes year-on-year. The Company deepened the professional benchmarking of alumina, electrolytic aluminum, carbon and energy, and started the process benchmarking. According to the “six-step method”, the Company studied and determined 65 full-factor benchmarking programs within 7 types of professions. The Company consolidated the management model of “five standards and one control” for electrolytic aluminum, and promoted the management model of “three improvements and one upgrade” for alumina. The first-grade alumina product rate was 93%, the first-grade aluminum liquid 99.85 tank accounted for 76.7%, and the first-grade carbon product rate was 74.3%, all of which were the best in history; The comprehensive energy consumption of alumina and the comprehensive AC power consumption of aluminum liquid decreased by 11.8 kg of standard coal/tonne and 121 kWh/tonne, respectively, as compared with the same period of last year. The profit per unit product of 8 carbon production lines entered top one-third of the industry. The business outsourcing expenses and the number of external contractors decreased by 20% and 45% year-on-year, respectively.
3. The Company steadily promoted sustainable development and continuously exerted synergy effect. The Company focused on acquiring bauxite and obtained 2 new bauxite exploration rights. The bauxite of Guangxi Jiaomei with an annual output of 2,000,000 tonnes was put into operation in advance; By accelerating the implementation of green industry, the 250MW photovoltaic project in Ningdong was steadily advancing, and the utilization of red mud by enterprises such as Guangxi Branch and Guangxi Huasheng continued to increase. The comprehensive utilization rate of red mud increased to 7.9%. Shanxi New Materials Aluminum Ash Project obtained the operation qualification. The Company accelerated the development of recycled aluminum and acquired and consumed a total of 107,000 tonnes of aluminum waste. By strengthening market forecast and expanding the sources of imported mines, the Company actively responded to the reduction of bauxite exports from Indonesia and Australia, and sign an underwriting agreement of TT coal mine in Mongolia for 10.00 million tonnes coking coal per year. The Company also continued to promote lean procurement and digital operation to effectively reduce the procurement costs of bulk raw materials and fuels such as coal, alkali and coke. The Company reduced the logistics cost by carrying out network freight operation.

4. The Company continued to optimize scientific research system with remarkable achievements in technological research. The Company strengthened mechanism innovation, gathered resources of 9 professional field technology centres, gradually enhanced the synergy of research and development for breakthrough, applied for 5 national level platforms and carried out 35 scientific and technological projects; implemented science and technology development support fund plan, and implemented incentive models such as performance bonus, project dividend and investment follow-up; accelerated the layout of energy-saving and carbon-reducing science and technology research and development in aluminium smelting, carried out integrated industrial trials of complete sets of technologies and accelerated industrialization demonstration and industrial tests of high-purity alumina and high-purity aluminum; Zunyi Aluminium's wet oxidation, desulfurization and decarburization technology has achieved remarkable results, opening up a new path for high-sulphur and high-carbon ore utilization; Nine national and group standards were drafted and issued, and 129 patents were granted.
5. The Company promoted professional and regional integration in an orderly manner and iterated and upgraded digital transformation. The Company implemented refined professional management of alumina and carbon and integrated management and integration of enterprises, and expanded the implementation of professional managers system. The Company formulated a digital "1234" action plan, built a unified data standard system, and the production management and control platform of the excellent technology center was put into trial operation; Guangxi Huasheng Smart Factory has formed 12 replicable modules, increased the labor productivity by 7.8%, and accelerated the replication of smart factories by batches.
6. The Company further deepened the management reform and continuously improved the market-oriented operation mechanism. The Company further refined and improved the contractual management of tenure system and the performance contracts of professional

7. The Company continued to strengthen the guidance of Party building and achieved remarkable results in integration and improvement. The Company gave full play to the leading role of the Party Committee in “provide direction, manage the overall situation and promote implementation”, by improving the rules of procedure of Party Committee, strictly implementing the “Three Importance and One Greatness” decision-making system and list of major operation and management matters for the Party Committee’s research and discussion. Corporate governance has been further improved. By solidly carrying out the themed practice activity of “playing role as front-runners, building a strong army, and serving as a good leader to welcome the 20th National Congress”, the Company gave priority to solving the difficulties in production and operation and strengthened the mission and responsibility for the main objectives of activities. In the key links such as pandemic prevention and control, stable production and secure supply, and emergency repair and rescue, the grass-roots Party organizations played the role of stronghold of combat and the party members played a pioneering and exemplary role to provide strong guarantee to ensure the smooth development of the Company’s work.

OUTLOOK AND PROSPECT

In the second half of 2022, the Company will continue to follow through the new development concept by adhering to the direction of green, low-carbon and high-quality development, firmly implementing the “Coastal and Overseas” strategy, and continue to optimize the layout structure, promote the industrial cluster development, actively build a new pattern of 3×5 industrial development, accelerate the establishment of a technological innovation system that effectively connects the R&D chain and the industrial chain, and focus on the key areas, key products and key technologies to integrate the industrial chain. The Company will also promote the optimization and upgrading of the industrial chain, firmly become the “chain leader” of the modern aluminum industry chain, thus to give a way to better play its leading role in the industry. The key tasks to be carried out by the Company include:

1. Strengthening value management and promoting quality and efficiency enhancement. The Company will continue to improve the benchmarking system by solidly carrying out professional benchmarking, continuing to deepen process benchmarking, strengthening the replication and promotion of the management model of “three improvements and one upgrade” of alumina and “five standards and one control” of electrolytic aluminum, and establishing a long-term mechanism for management improvement. The Company will improve the market-oriented cost offsetting mechanism, strengthen the management of all staff, all business chains and all cost factors, focus on the key links affecting the efficiency and effectiveness of the Company, increase penetration analysis, promote the three-year cost reduction action in depth, continue to improve cost competitiveness and enhance risk resistance capacity; By strengthening production command and dispatch, the Company will pay close attention to equipment operation management, reduce abnormal suspension of equipment, and achieve long-term, safe and efficient operation; By strengthening its research and judgement, the Company will strive to improve its domestic bauxite supply capacity to reduce mining costs. By optimizing the mining plan in Guinea and expanding the procurement of imported mines, the Company will improve the supply capacity. Therefore, the Company will strengthen the organization of alumina production under complex ore conditions through impurity removal and consumption cost reduction to improve product quality. Through the communication with local enterprises, the Company will strive to ensure power supply and price reduction by improving hierarchical management and control, aiming to achieve full, stable and excellent production. The Company will also carry out the whole process benchmarking for carbon by strengthening the refinement management of each process and improving product quality and increase profitability. In order to achieve safe and stable production, the Company will optimize coal production organization and improve production conditions.

2. Accelerating structural adjustment and optimizing industrial layout. The Company will actively promote the replacement of production capacity in existing mining areas, improving its endeavors in the transfer of exploration rights to mining rights and expansion of relevant mines, and effectively improving the resource supply capacity; By strengthening the research of overseas industrial layout and creating conditions for the construction of overseas alumina production bases, the Company will seize the policy window and implement the 2,000,000 tonnes alumina project of Guangxi Huasheng Phase II. By coordinating the local area network construction and new energy acquisition and accelerating the construction of the Huayun Phase III electrolytic aluminum project, the Company will actively develop new energy industry and accelerate the construction of photovoltaic projects; By advancing strategic cooperation with central energy enterprises and exploring a safer and more efficient energy structure adjustment plan, the Group will accelerate the establishment of smart factory construction specifications, focus on promoting the construction of the second phase of the smart factory of Guangxi Huasheng, and promote and replicate the “one enterprise, one policy” to achieve iterative upgrade.
3. Improving the innovation mechanism to empower high-quality development. By promoting the application and construction of national platform with high quality as well as accelerating the research of key common technologies, Zhengzhou Research Institute will be built into a reform model of the scientific reform demonstration action to deepen the application of the production management and control system of the excellent technology center. By improving the scientific and technological resource coordination capability of the green research institute, the Company will strive to achieve new breakthroughs in scientific and technological research featuring on energy conservation and carbon reduction, and the comprehensive utilization of “three wastes” of red mud and electrolytic aluminum. The field technology center will accelerate industrial testing and industrial demonstration to improve the Company’s market competitiveness. Production enterprises will focus on cost reduction and quality improvement by vigorously carrying out various technological breakthroughs and minor reforms to actively promote the transformation and application of relevant achievements, and continuously enhance value creation capabilities. The Company will improve management mechanisms such as “selecting the best candidates to undertake key research projects” and give scientific research leaders and project teams greater voice right. The Company will make good use of incentive policies such as risk mortgage, project dividends and profit sharing from achievement transformation to improve the enthusiasm and initiative of scientific researchers. The Company will also accelerate the construction of a career development system for scientific and technological talents led by chief scientists, so as to facilitate the career development channels for scientific and technological talents, and build a high-level scientific and technological talent team.

4. Accelerating technological breakthroughs and vigorously developing green industries. By implementing its dual-carbon plan, the Company will accelerate the development of energy-saving and carbon-reducing technologies, and continue to promote the innovation and application of energy-saving technologies. The Company will also pick up pace to utilize residual heat of the fluidized bed in the aluminum oxide roasting furnace and promote the industrialization of the application of graphite cathode technology and accelerate the research and development of high-end products. The Company will deepen the action plan for comprehensive utilization of red mud, strengthen communication with local governments, promote cooperation with steel, cement, building materials, transportation and other industries, expand the red mud consumption field, and improve the comprehensive utilization rate of red mud. The Company will accelerate the industrialization demonstrations of technological achievements such as disposal of aluminum electrolytic hazardous waste. The Company will improve the incentive mechanism for secondary aluminum and establish a market-oriented business model for secondary aluminum.
5. Deepening management reform and stimulating vitality. By accelerating the integration of carbon and refined alumina, improving the professional operation level and market competitiveness, the Company will build a “specialized, refined and unique” enterprise. The Company will strictly implement the end-to-end adjustment and incompetence exit system for leaders, extend the contractual management of tenure system to the heads of corporate functional departments and branches, strengthen the management of “one person, one order”, and achieve rigid assessment and rigid fulfilment. The Company will improve the “double-link” mechanism between total salary, economic efficiency and labor productivity, implement “monthly assessment and monthly payment”, improve the “double-benchmark” incentive mechanism between performance, salary and market, promote differentiated incentives, and established a “multi-level” positive incentive system. By implementing the second batch of equity incentives, the Company will increase the full-cycle incentives for scientific and technological talents. By strengthening the dynamic management of the chief control personnel, the Company will form a good mutual pattern of labor productivity improvement and employee income growth.

6. Continuously improving the corporate governance system. By benchmarking world-class listed companies and carrying out special work to improve the quality of corporate governance, the Company will improve the governance system and standard operation. By strengthening vertical consistency and centralized management, and clarifying the boundary of powers and responsibilities of the Company's headquarters, professional companies, business platforms, scientific research units and entities, the Company will clarify the decision-making authority, and achieve clear boundaries, equal rights and responsibilities featuring efficient management. The Company will promote the standardized operation of the Board and the law-based performance of duties by the management, advance the coordinated operation of each governance body, and comprehensively improve the governance capability and level.

INTERIM RESULTS

The operating revenue of the Group for the six months ended 30 June 2022 was RMB145,403 million, representing an increase of 20.35% from the same period of the previous year. The net profit attributable to the owners of the Company and earnings per share attributable to the owners of the ordinary shares of the Company for the six months ended 30 June 2022 were RMB3,989 million and RMB0.231, respectively.

INTERIM DIVIDEND

The Company will not distribute interim dividend for the six months ended 30 June 2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the financial data of the Group and the notes thereto contained in this interim results report and other chapters.

BUSINESS SEGMENTS

The Company principally engages in exploration and mining of bauxite and coal resources; production, sales, and technical development of alumina, primary aluminum, aluminum alloy and carbon; international trading, logistics industry, thermal and new energy power generation, etc. The Company's business segments comprise:

Alumina segment consists of mining and purchasing bauxite and other raw materials, refining bauxite into alumina, and selling alumina both internally to the Group's electrolytic aluminum enterprises and trading enterprises and externally to customers outside the Group. This segment also includes the production and sales of chemical alumina and gallium metal.

Primary aluminum segment consists of procuring alumina, raw and auxiliary materials and electricity power, smelting alumina to produce primary aluminum, which is sold internally to the Group's trading enterprises and externally to customers outside the Group. This segment also includes the production and sales of carbon products, aluminum alloy products and other electrolytic aluminum products.

Trading segment is mainly engaged in the trading and logistics of alumina, primary aluminum, other nonferrous metal products, and crude fuels such as coal products, as well as raw and auxiliary materials to internal manufacturing enterprises and external customers.

Energy segment consists of coal, electricity generation from coal, wind power and photovoltaic power, and new energy equipment production, etc. Among its major products, coals are sold to internal manufacturing enterprises of the Group and external customers outside the Group; and electricity power generated by public power plants, wind power and photovoltaic power stations is sold to local grid companies.

Corporate and other operating segments include corporate and other aluminum-related research and development and other activities.

RESULTS OF OPERATIONS

The Group's net profit attributable to the shareholders of the Company for the first half of 2022 was RMB3,989 million, representing an increase of RMB895 million from RMB3,094 million for the corresponding period of the previous year, primarily due to the effect of the year-on-year increase in the profits of alumina and coal produced by the Company and of imported coking coal trading business.

REVENUE

The Group's revenue for the first half of 2022 was RMB145,403 million, representing an increase of RMB24,586 million from RMB120,817 million for the corresponding period of the previous year, primarily due to the increase in trading business income and the increase in market prices of major products.

COST OF SALES

The Group's cost of sales for the first half of 2022 was RMB131,109 million, representing an increase of RMB22,556 million from RMB108,553 million for the same period of the previous year, primarily due to the increase in trading business cost and the increase in the prices of crude fuel materials required for producing major products.

EXPENSES FOR THE PERIOD

Selling expenses: The Group's selling expenses for the first half of 2022 amounted to RMB142 million, representing generally the same level with RMB135 million for the same period of the previous year.

Administrative expenses: The Group's administrative expenses for the first half of 2022 amounted to RMB2,406 million, representing generally the same level with RMB2,359 million for the same period of the previous year.

Finance expenses: The Group's finance expenses for the first half of 2022 amounted to RMB1,669 million, representing a decrease of RMB248 million from RMB1,917 million for the same period of the previous year, mainly due to the year-on-year decrease in finance expenses through the Company's reduction in the size of interest-bearing debts and optimization of financing expenses.

RESEARCH AND DEVELOPMENT EXPENSES

The Group's research and development expenses for the first half of 2022 amounted to RMB1,626 million, representing an increase of RMB967 million from RMB659 million for the same period of the previous year. This was mainly due to the fact that the Company actively responded to the national "Dual Carbon" policy by optimizing its own business development and increasing supports in research and investment of energy conservation and emission reduction, high-end products, improvement of production process and comprehensive utilization of red mud and others.

IMPAIRMENT LOSSES ON PROPERTY, PLANT AND EQUIPMENT

INCOME TAX EXPENSES

The Group's income tax expenses for the first half of 2022 amounted to RMB1,010 million, representing a decrease of RMB237 million from RMB1,247 million for the same period of the previous year, mainly due to the effect of the relatively higher deferred income tax assets to be recognized for deductible temporary differences based on the future earnings of its subsidiaries.

ALUMINA SEGMENT

Revenue

In the first half of 2022, the operating revenue of the alumina segment of the Group amounted to RMB27,958 million, representing an increase of RMB3,715 million from RMB24,243 million in the same period of previous year, which was mainly due to the year-on-year increase of sales price of alumina.

Segment Results

The Group's total profit in the alumina segment for the first half of 2022 was RMB1,171 million, representing a decrease of RMB233 million from RMB1,404 million for the same period of the previous year, which was mainly due to the year-on-year increase of operating profit from alumina products of the Company as well as the decrease in profit incurred from the provision on asset impairment for certain production lines based on the changes from external environment during the year.

PRIMARY ALUMINUM SEGMENT

Revenue

In the first half of 2022, the operating revenue of the primary aluminum segment of the Group amounted to RMB41,928 million, representing an increase of RMB9,364 million from RMB32,564 million in the same period of previous year, which was mainly due to the year-on-year increase of sales price of electrolytic aluminum.

Segment Results

The Group's profit before income tax in the primary aluminum segment for the first half of 2022 was RMB3,911 million, representing a decrease of RMB1,881 million from RMB5,792 million for the same period of the previous year, which was mainly due to the effect of the year-on-year decrease of gross profit from electrolytic aluminum products for the year as well as the decrease in profit incurred from the expenses from resumption of work and production in Liancheng Branch for the year.

TRADING SEGMENT

Revenue

The Group's revenue from the trading segment for the first half of 2022 was RMB120,508 million, representing an increase of RMB22,571 million from RMB97,937 million for the same period of the previous year, mainly due to the effect of the year-on-year increase both in sale and price from imported coking coal, coupled with the year-on-year increase in sale and price from trading-type products, in the first half of the year.

Segment Results

The Group's profit before income tax in the trading segment for the first half of 2022 was RMB1,243 million, representing an increase in profit of RMB548 million from RMB695 million for the same period of the previous year, mainly due to the effect of the increase in profit from imported coking coal, coupled with the increase in profit from other trading-type products.

ENERGY SEGMENT

Revenue

The Group's revenue from the energy segment for the first half of 2022 was RMB4,819 million, representing an increase of RMB1,666 million from RMB3,153 million for the same period of the previous year, which was mainly due to the effect of year-on-year increase in production and sales volume of coal of the Company.

Segment Results

The Group's profit before income tax in the energy segment for the first half of 2022 was RMB1,091 million, representing an increase in profit of RMB1,524 million from RMB-433 million for the same period of the previous year, which was mainly due to the year-on-year increase in profit as a result of the year-on-year increase in production and sales volume of coal of the Company.

Non-Current Assets and Liabilities

As at 30 June 2022, the Group's non-current assets amounted to RMB137,226 million, representing a decrease of RMB6,494 million from RMB143,720 million as at the end of the previous year. This was mainly due to the impact of depreciation and amortization of long-term assets.

As at 30 June 2022, the Group's non-current liabilities amounted to RMB63,006 million, representing a decrease of RMB4,407 million from RMB67,413 million as at the end of the previous year. This was mainly due to the decrease in medium and long-term interest-bearing debts.

As at 30 June 2022, the gearing ratio of the Group was 60.01% (which was computed by dividing the total liabilities by the total assets of the Group as at 30 June 2022), representing a decrease of 2.14 percentage points from 62.15% as of the end of the previous year, which was mainly due to the decrease in interest-bearing debts of the Company.

CAPITAL EXPENDITURES, CAPITAL COMMITMENTS AND INVESTMENT UNDERTAKINGS

As of 30 June 2022, the Group's project investment expenditures (excluding equity investment) amounted to RMB2,094 million, of which: infrastructure and technological transformation investment accounted for 83.09%; resource development investment accounted for 13.66%; scientific research investment accounted for 3.25%.

As of 30 June 2022, the Group's contracted but not provided capital commitment to fixed assets investment amounted to RMB1,001 million.

As of 30 June 2022, the Group's investment undertakings to joint ventures and associates amounted to RMB442 million, comprising RMB400 million to Chinalco Overseas Development Co., Ltd.* (中鋁海外發展有限公司), RMB8 million to Loudi Zhongyu New Materials Co., Ltd.* (婁底中禹新材料有限公司), RMB28 million to Shanxi Qinlv Taiyue New Materials Co., Ltd.* (山西沁鋁太岳新材料有限公司) and RMB6 million to Chinalco Tendering Company Limited* (中鋁招標有限公司), respectively.

CASH AND CASH EQUIVALENTS

As of 30 June 2022, the Group's cash and cash equivalents amounted to RMB18,873 million.

CASH FLOWS FROM OPERATING ACTIVITIES

In the first half of 2022, the Group's cash flows generated from operating activities were net cash inflows amounting to RMB14,983 million, representing an increase of RMB5,499 million in cash inflows from RMB9,484 million of net cash inflows for the same period of the previous year. This was mainly due to the impact of the improvement in working capacity of the capital of the Company and year-on-year increase in profit.

CASH FLOWS FROM INVESTING ACTIVITIES

In the first half of 2022, the Group's cash flows generated from investing activities were net cash outflows amounting to RMB5,929 million, representing an increase of RMB292 million in cash outflows from RMB5,637 million of net cash outflows for the same period of the previous year. This was mainly due to the effect of the year-on-year increase in capital expenditures during the year, and the higher collection of external foreign investment amount in the corresponding period of last year.

CASH FLOWS FROM FINANCING ACTIVITIES

In the first half of 2022, the Group's cash flows generated from financing activities were net cash outflows amounting to RMB8,079 million, representing an increase of RMB1,761 million in cash outflows from RMB6,318 million of net cash outflows for the same period of the previous year. This was mainly attributable to the increase in repayment of borrowings.

OVERALL ANALYSIS OF EXTERNAL EQUITY INVESTMENTS

As of 30 June 2022, the Group's long-term equity investments amounted to RMB13,130 million, representing an increase of RMB142 million from RMB12,988 million as at the end of 2021, which was primarily due to the increase in the investment income recognised for share-holding enterprises.

EXCHANGE RATE FLUCTUATION RISK AND HEDGING

Certain subsidiaries of the Company have been operating import and export business for long and are exposed to the risk of exchange rate fluctuations. In order to mitigate the impact of exchange rate fluctuations on the profits of such enterprises, as considered and approved at the twenty-sixth meeting of the seventh session of the Board of the Company held on 22 March 2022, such subsidiaries were approved to carry out monetary financial derivatives business, the types of which included but were not limited to derivative businesses such as forward settlement and sale of US dollars, with a term from 1 April 2022 to 31 March 2023, and during the aforesaid term, the hedging quota of US dollar exchange rate for such subsidiaries shall not exceed US\$1,517 million.

Please refer to the relevant announcement of the Company dated 22 March 2022 for details of the above matter.

INVESTMENT OF THE COMPANY

USE OF PROCEEDS

At the 24th meeting of the seventh session of the Board of the Company held on 21 December 2021, the Company considered and approved the relevant proposals on the Company's 2021 Restricted Shares Incentive Scheme (the "**Incentive Scheme**"). SIGNIFICANT EVENTS

1. CORPORATE GOVERNANCE

The Company has strictly complied with the requirements of the Company Law of the People's Republic of China, the Securities Law of the People's Republic of China, relevant provisions of the China Securities Regulatory Commission (the "**CSRC**"), the Rules Governing the Listing of Stocks on Shanghai Stock Exchange and the Hong Kong Listing Rules, and seriously performed its governance obligations in line with the relevant requirements of the CSRC. The Company has also strictly complied with the requirements of the Hong Kong Listing Rules in relation to corporate governance.

The Company will stay in strict compliance with the requirements of the regulatory bodies including the CSRC, Beijing Securities Regulatory Bureau, the SSE and the Hong Kong Stock Exchange. Through regulatory compliance and strict self-regulation, the Company will continuously improve its various corporate governance systems to further enhance its corporate governance level and internal control system, aiming at protecting the interest of its shareholders, as well as bring returns to the shareholders through high-quality development results of the Company. The Company will also continue to comply with the requirements on corporate governance under the Hong Kong Listing Rules.

Since its incorporation, the Company has been completely separated from its controlling shareholder in terms of business, personnel, assets and finance. The Company has independent and comprehensive business and has the ability to operate on its own.

2. DISTRIBUTION OF FINAL DIVIDEND FOR THE YEAR 2021

As audited, the net profit of the financial statements of the parent company for the year 2021 was approximately RMB2,546 million. As considered and approved at the 26th meeting of the seventh session of the Board of the Company held on 22 March 2022, the Company proposed to pay cash dividends to the shareholders at RMB0.032 per share (tax inclusive), with a total dividend payout of approximately RMB545 million. On 13 June 2022, the registration of the First Grant of shares under the 2021 Restricted Share Incentive Scheme of the Company was completed and the total share capital of the Company changed. The Company adjusted the dividend payout amount per share from RMB0.032 (tax inclusive) to RMB0.0318 (tax inclusive) based on the total share capital after the change and made an announcement in this regard on 14 June 2022. On 21 June 2022, the aforesaid dividend payment plan was considered and approved at the 2021 annual general meeting of the Company.

The Company has completed the payment of the final dividend for 2021 on 19 August 2022.

3. MATERIAL LITIGATION AND ARBITRATION AND CONTINGENT LIABILITIES

During the reporting period, the Company had no material litigation, arbitration, or material contingent liabilities. For details, please refer to the section headed “Contingent Liabilities in Note 22 to Unaudited Interim Condensed Consolidated Financial Statements” in this report.

Non-Exempted One-off Connected Transactions

(1) The adoption of the 2021 Restricted Share Incentive Scheme of the Company and grant of restricted A shares to connected persons under the Incentive Scheme

On 21 December 2021, the 24th meeting of the seventh session of the Board of the Company considered and approved the relevant proposals on the Company's 2021 Restricted Share Incentive Scheme. The Company proposed to issue no more than 141,000,000 restricted A shares to the participants. Specifically, 131,000,000 shares are proposed to be granted under the first grant, and 10,000,000 shares are reserved to be granted. On 26 April 2022, at the 2022 first extraordinary general meeting, the 2022 first class meeting for A shareholders and the 2022 first class meeting for H shareholders, the resolutions in relation to the 2021 Restricted Share Incentive Scheme of the Company were considered and passed.

In view of the fulfillment of the conditions for grant under the Incentive Scheme, as authorised by the 2022 first extraordinary general meeting, the 2022 first class meeting for A shareholders and the 2022 first class meeting for H shareholders, the Company convened the 16th meeting of the seventh session of the Supervisory Committee and the 29th meeting of the seventh session of the Board on 24 May and 25 May 2022 respectively, at which the Resolution in relation to Relevant Matters on the Adjustment to the 2021 Restricted Share Incentive Scheme of the Company and the Resolution in relation to First Grant of Restricted Shares to Participants were considered and passed, which approved the grant of 113,438,200 restricted A shares to 943 participants at a grant price of RMB3.08 per share with 25 May 2022 as the grant date.

On 14 June 2022, the Company received the Securities Transfer Registration Certificate issued by the CSDC Shanghai Branch, and the registration of the restricted shares first granted under the incentive scheme of the Company was completed. The First Grant was registered as follows: 25 May 2022 is the grant date and 112,270,300 restricted A shares were granted to 930 participants at a grant price of RMB3.08 per share.

The Incentive Scheme does not constitute a share option scheme under Chapter 17 of the Hong Kong Listing Rules. Certain participants under the First Grant are connected participants and are connected persons of the Company. The grant of restricted A shares to the connected participants under the Incentive Scheme will constitute a connected transaction of the Company under Chapter 14A of the Hong Kong Listing Rules and is subject to the reporting, announcement and independent shareholders' approval requirements under the Hong Kong Listing Rules. Under the First Grant, the Company granted a total of 6,126,500 restricted A shares to 30 connected persons.

For details of the above matters, please refer to the announcements of the Company dated 21 December 2021, 22 December 2021, 4 March 2022, 6 April 2022, 21 April 2022, 26 April 2022, 25 May 2022 and 14 June 2022 and the circular dated 7 March 2022, respectively.

(2) *Non-exercise of the option in respect of the transfer of the 50% equity interest in Inner Mongolia Huayun*

On 25 May 2022, at the 29th meeting of the seventh session of the Board of the Company, the Resolution in relation to the Transaction of 50% Equity Interest in Inner Mongolia Huayun New Materials Co., Ltd. was considered and passed, pursuant to which, it was agreed that Baotou Aluminum, a wholly-owned subsidiary of the Company, would not exercise the option in respect of 50% equity interest in Inner Mongolia Huayun to be transferred by Baotou Communications Investment Group Limited Company ("**Baotou Communications Group**") to Chinalco.

As Inner Mongolia Huayun is a significant subsidiary of the Company and Baotou Communications Group directly holds 50% equity interest in Inner Mongolia Huayun. Therefore, Baotou Communications Group is a connected person of the Company at the subsidiary level under Chapter 14A of the Hong Kong Listing Rules and the non-exercise of option constitutes a connected transaction under Chapter 14A of the Hong Kong Listing Rules.

As the highest applicable percentage ratio in respect of the transaction exceeds 1% but is less than 5%, it is subject to the relevant reporting and announcement requirements under Chapter 14A of the Hong Kong Listing Rules but exempt from the independent shareholders' approval requirement.

Please refer to the announcement of the Company dated 25 May 2022 for details of the above matter.

So far as the Company understood, Baotou Communications Group and Chinalco formally entered into an equity transfer agreement on 2 August 2022 in respect of the transfer of 50% equity interest in Inner Mongolia Huayun.

5. PERFORMANCE OF UNDERTAKINGS

There were no outstanding undertakings during the reporting period.

6. OTHER SIGNIFICANT EVENTS

(1) Change of accounting policy

- (i) At the 26th meeting of the seventh session of the Board of the Company held on 22 March 2022, the Resolution in relation to the Proposed Change of Accounting Policy by the Company was considered and approved, pursuant to which, the Board approved to carry forward the transportation costs related to the transportation activities for the purpose of fulfilling the revenue contract into the item of “cost of sales” in the income statement by the Company since 2021, when the revenue of goods and services is recognized, instead of “selling expenses” onwards. Retrospective adjustments will be made to previous years’ data in accordance with the requirements related to change of accounting policy under the accounting standards.

The change of accounting policy of the Company will affect the reclassification between items in the income statement, which will not have material impact on the Company’s financial position, operating results and cash flow.

Please refer to the announcement of the Company dated 22 March 2022 for details of the above matter.

- (ii) At the fourth meeting of the eighth session of the Board the Company held on 23 August 2022, the Resolution on the Proposed Change in Accounting Policy of the Company was considered and passed, pursuant to which, the Company was approved to, from 2022 onwards, account for the revenue and costs realised from the external sales of products or by-products produced before the fixed assets reach their intended useable state in the profit or loss for the current period respectively, and the value of fixed assets shall no longer be written down. Retrospective adjustment to the data for the prior years shall be made in accordance with the relevant requirements of the accounting standards.

The change in accounting policy will have no material impact on the Company's financial indicators including assets, liabilities, equity and profit.

Please refer to the Company's announcement dated 23 August 2022 for details of the above matter.

(2) Amendments to the Articles of Association, the Rules of Procedures for Shareholders' Meeting and the Rules of Procedures for the Board Meeting

In accordance with the latest revised Guidelines on the Articles of Association of Listed Companies (Revised 2022), the Rules Governing the Listing of Stocks on the Shanghai Stock Exchange (Revised January 2022), the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited as amended from time to time and other relevant laws, regulations and normative documents, taking into account the actual situation of the Company, the Board proposed to make amendments to the Articles of Association, the Rules of Procedures for Shareholders' Meeting and the Rules of Procedures for the Board Meeting.

At the first meeting of the eighth session of the Board of the Company held on 21 June 2022, the Resolution in relation to the Amendments to the Articles of Association of the Aluminum Corporation of China Limited, the Resolution in relation to the Amendments to the Rules of Procedures for Shareholders' Meeting of Aluminum Corporation of China Limited and the Resolution in relation to the Amendments to the Rules of Procedures for the Board Meeting of Aluminum Corporation of China Limited were considered and passed.

For details of the amendments to the Articles of Association, the Rules of Procedures for Shareholders' Meeting and the Rules of Procedures for the Board Meeting, please refer to the announcement of the Company dated 21 June 2022 and the circular of the Company dated 12 August 2022.

The proposed amendments to the Articles of Association, the Rules of Procedures for Shareholders' Meeting and the Rules of Procedures for the Board Meeting shall be subject to the consideration and approval at the general meeting of the Company.

(3) Major and connected transaction in respect of acquisition of 19% equity interests in Yunnan Aluminum Co., Ltd. (雲南鋁業股份有限公司) (“**Yunnan Aluminum**”)

At the second meeting of the eighth session of the Board of the Company held on 24 July 2022, the Resolution in relation to the Proposed Acquisition of 19% Equity Interests in Yunnan Aluminum Co., Ltd. by the Company was considered and passed, which approved the entering into of the shares transfer agreement between the Company and Yunnan Metallurgical Group Co., Ltd. (雲南冶金集團股份有限公司) (“**Yunnan Metallurgical**”), pursuant to which, the Company has agreed to acquire and Yunnan Metallurgical has agreed to dispose of 658,911,907 shares in Yunnan Aluminum, representing approximately 19% of the total issued share capital of Yunnan Aluminum, at a transaction consideration of approximately RMB6,661 million. Upon the completion of aforesaid shares transfer, the financial results of Yunnan Aluminum will be consolidated into the financial statements of the Company, and Yunnan Aluminum will become a subsidiary of the Company.

Chinalco is the controlling shareholder of the Company, and Yunnan Metallurgical is a subsidiary of Chinalco. Therefore, Yunnan Metallurgical is a connected person of the Company under the Hong Kong Listing Rules. As the highest applicable percentage ratio (as defined under the Hong Kong Listing Rules) in respect of the transaction contemplated under the shares transfer agreement exceeds 25% but is less than 100%, the transaction constitutes a major transaction under Chapter 14 of the Hong Kong Listing Rules and a connected transaction under Chapter 14A of the Hong Kong Listing Rules.

On 24 July 2022, the Company and Yunnan Metallurgical signed a shares transfer agreement accompanied with operative clauses. The acquisition of shares is subject to the general meeting of the Company for consideration and approval.

Please refer to the announcement of the Company dated 24 July 2022 and the circular of the Company dated 12 August 2022 for details of the above matter.

(4) Application for delisting of the American depositary shares of the Company (the “**ADSs**”) from the New York Stock Exchange (“**NYSE**”) and deregistration of such ADSs and the underlying H shares under the U.S. Securities Exchange Act

At the third meeting of the eighth session of the Board of the Company held on 12 August 2022, the Resolution in relation to the Delisting of the American Depositary Shares of the Company from the New York Stock Exchange and Deregistration under the U.S. Securities Exchange Act was considered and passed. Due to a number of considerations, including the limited trading volume of the ADSs of the Company as compared to the worldwide trading volume of H shares of the Company, and the considerable administrative burden and costs associated with maintaining the listing of the ADSs on the NYSE and the registration of the ADSs and the underlying H shares with the U.S. Securities and Exchange Commission and complying with the periodic reporting and related obligations under the Securities Exchange Act, the Board of the Company approved the delisting of the ADSs from the NYSE and the deregistration of the ADSs and underlying H shares under the Securities Exchange Act.

The Company has notified the NYSE on 12 August 2022 (EDT) of its application for voluntary delisting of its ADSs from the NYSE. The last trading day of ADSs of the Company on the NYSE will be on or around 1 September 2022. On and after such date, the ADSs of the Company will no longer be listed on the NYSE. After the delisting becomes effective, once the Company satisfies the conditions for deregistration as required under the Securities Exchange Act, the Company will apply to the U.S. Securities and Exchange Commission for the deregistration of the ADSs and underlying H shares.

Please refer to the announcement of the Company dated 12 August 2022 for details of the above-mentioned matter.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION TO THE BOARD OF DIRECTORS OF ALUMINUM CORPORATION OF CHINA LIMITED (Continued)

(incorporated in the People's Republic of China with limited liability)

SCOPE OF REVIEW

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information of the Group is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Significant accounting policies (CONTINUED)

The Group recognised the cumulative effect of initially applying the amendment as an adjustment to the opening balance of retained earnings at the beginning of that earliest period presented. This change in accounting policy has been accounted for retrospectively and comparative information has been restated.

		<i>RMB</i>
The change in accounting policy	Items	1 January 2021
According to IAS 16 Property, Plant and Equipment and IFRS 15 Revenue from Contracts with Customers, an entity recognises the proceeds from selling items produced while bringing that asset to be capable of operating in the manner intended by management, and the cost of producing those items, in profit or loss.	Property, plant and equipment	63,068
	Retained earnings	(63,068)
		For the six months ended 30 June 2021
	Cost of sales	2,813
	Property, plant and equipment	(2,813)

The above change in accounting policy did not have impact on revenue for the current and comparative period because there is no trial production revenue for the relevant periods. All adjustments is related to the revenue during trial production phase for the periods before 1 January 2021 which was previously offset against property plant and equipment, and related impact of depreciation.

(b) Segment information

The executive presidents committee of the Company have been identified as the chief operating decision makers. The committee is responsible for the review of the internal reports in order to allocate resources to operating segments and assess their performance.

The committee considers the business from a product perspective comprising alumina, primary aluminum and energy for the Group's manufacturing business, which are identified as separate reportable operating segments. In addition, the Group's trading business is identified as a separate reportable operating segment. The Group's reportable operating segments also include corporate and other operating segments.

The committee assesses the performance of operating segments based on profit or loss before income tax in related periods. The manner of assessment used by the committee is consistent with that applied to the consolidated financial information for the year ended 31 December 2021. Management has determined the reportable operating segments based on the reports reviewed by the committee that are used to make strategic decisions.

The Group's five reportable operating segments are summarised as follows:

- The alumina segment, which consists of mining and purchase of bauxite and other raw materials, refining bauxite into alumina, and selling alumina both internally to the Group's aluminum enterprises and trading enterprises and externally to customers outside the Group. This segment also includes the production and sale of multi-form alumina bauxite.
- The primary aluminum segment, which consists of procuring alumina and other raw materials, supplemental materials and electricity power, smelting alumina to produce primary aluminum which is sold to the Group's trading enterprises and external customers, including Chinalco and its subsidiaries. This segment also includes the production and sale of carbon products and aluminum alloy and other aluminum products.

(b) Segment information (continued)

- The trading segment, which consists of the trading of alumina, primary aluminum, aluminum fabrication products, other non-ferrous metal products, coal products and raw materials and supplemental materials and logistics and transport services to internal manufacturing plants and external customers. The products are sourced from fellow subsidiaries and international and domestic suppliers of the Group. Sales of products manufactured by the Group's manufacturing business are included in the total revenue of the trading segment and are eliminated with the segment revenue of the respective segments which supplied the products to the trading segment.
- The energy segment mainly includes coal mining, electricity generation by thermal power, wind power and solar power, new energy related equipment manufacturing business. Sales of coals are mainly to the Group's internal and external coal consuming customers; electricity is sold to regional power grid corporations.
- Corporate and other operating segments, which mainly include management of corporate, research and development activities and others.

Prepaid current income tax and deferred tax assets are excluded from segment assets, and income tax payable and deferred tax liabilities are excluded from segment liabilities. All sales among the reportable operating segments were conducted on terms mutually agreed among group companies, and have been eliminated upon consolidation.

5 PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

In the prior years, the Group terminated an alumina production line and the related facilities as a result of the needs of local urban development. Based on the relevant rules and regulations, the Group would be entitled to a compensation by the local government out of the commercial development of the land on which the production line is located.

During the period, the Group was informed by the local government that, because of the financial constrain, the real estate market outlook and the urban planning needs, it is no longer feasible to commercially develop this piece of land or to compensate the Group in any form. The change of government decision constitutes an impairment indicator. An impairment test was performed by management based on fair value less cost of disposal and an impairment loss of RMB2,101 million was recognised as at 30 June 2022.

The land occupied by the terminated alumina production line is leased from the Chinalco group. The Group reassessed the leasing period, and accordingly, land use right assets of RMB893 million and lease liabilities of RMB927 million were written off and a disposal gain of RMB35 million was recognised during the period.

Others	3,275,397	3,326,967
	135,282,780	111,705,320

Note: During the period, the Group changed its overall alumina production plan, which reduced the alumina production level of certain subsidiaries considering overall layout of alumina capacity, cost efficiency of production and the supply of bauxite in different regions. Accordingly, a certain amount of bauxite originally intended for the production of alumina now becomes excessive. The Group has decided to dispose of this excessive bauxite directly.

Given the change in the intended use of the bauxite inventories, the Group has re-assessed the provision of this excessive bauxite based on the direct selling price of bauxite ores. As a result, an inventory impairment loss of RMB535 million was recognised as at 30 June 2022.

17 EARNINGS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE COMPANY

Basic

Basic earnings per share was calculated by dividing the adjusted profit attributable to ordinary equity holders of the Company by the weighted average number of shares in issue during the period.

For the purpose of calculating basic earnings per share, the Group adjusted the profit attributable to owners of the Company by deducting the after-tax amounts of cumulative distribution reserved for the period for other equity instruments, which were issued by the Group and classified as equity instrument.

	For the six months ended 30 June	
	2022	2021 (Restated)
Profit attributable to owners of the Company (in thousands of RMB)	3,989,370	3,094,161
Other equity instruments' distribution reserved (in thousands of RMB)	(53,750)	(104,750)
Profit attributable to ordinary shares holders of the Company	3,935,620	2,989,411

21 FINANCIAL RISK MANAGEMENT

21.1 Financial risk management

(a) Financial risk factors

The Group's activities expose it to a variety of financial risks, including market risk (including foreign currency risk, interest rate risk and commodity price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise the potential adverse effects on the Group's financial performance.

Risk management is carried out by the treasury management department (the "**Group Treasury**") under policies approved by the Board of Directors of the Company. The Group Treasury identifies, evaluates and hedges financial risks through close cooperation with the Group's operating units.

The unaudited interim condensed consolidated financial information does not include all financial risk management information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements for the year ended 31 December 2021.
